

PERAK
DIGITAL TRANSFORMATION CENTRE

AI AND DIGITAL TRANSFORMATIONS

EMPOWERING MINDS. TRANSFORMING FUTURES.

COURSE DESCRIPTION

This course introduces participants to the fundamentals of Artificial Intelligence (AI) and Digital Transformations. It explores how AI technologies and digital strategies are reshaping industries and driving innovation. Participants will gain practical knowledge and hands-on experience to understand and apply digital solutions in real-world scenarios.

OBJECTIVES

- Understand the core concepts of AI and digital transformation.
- Explore AI tools and emerging digital technologies.
- Develop skills to identify and implement digital solutions.
- Enhance problem-solving and decision-making using data-driven approaches.
- Prepare participants for future-ready careers in the digital economy.

LEARNING OUTCOMES

- ✓ Explain key AI concepts and applications.
- ✓ Analyze business processes for digital transformation.
- ✓ Apply AI tools and digital technologies effectively.
- ✓ Design and evaluate digital solutions.
- ✓ Demonstrate future-ready skills for evolving industries.

TRAINING MODE

Online
and
Face to Face

TARGET AUDIENCE

Fresh Graduates
and
Working Adults

FEE

FULLY FUNDED
