

DATA SCIENCE

COURSE DESCRIPTION

This Data Science course provides a comprehensive introduction to the key concepts, tools, and techniques used to extract meaningful insights from data. Participants will learn data collection, cleaning, analysis, visualization, and machine learning to solve real-world problems and make data-driven decisions.

OBJECTIVE

To equip learners with the knowledge and practical skills in data science to analyze data, build predictive models, and communicate insights effectively for informed decision-making.

LEARNING OUTCOME

By the end of this course, participants will be able to:

- ✓ Understand the fundamentals of data science and its applications
- ✓ Collect, clean, and preprocess data for analysis
- ✓ Perform exploratory data analysis and data visualization
- ✓ Build and evaluate machine learning models
- ✓ Interpret results and present data-driven insights clearly

TRAINING MODE

Online and Face to Face

TARGET AUDIENCE

Fresh Graduates
and working adults

FEE

FULLY FUNDED

ADDRESS

No. 2A, Jalan Lapangan Suria,
Medan Lapangan Suria,
31350, Ipoh, Perak, Malaysia.
